

**40 YEARS  
IN HUMIDIFICATION**

**New electric humidifiers  
ELMC – RTH series**

# New models ELMC

# Devatec ELMC New Model

- Stronger door fixation with inserts.

- Control voltage in 24VAC
- Stronger fixation on the cabinet with screws

- New cabinet design with better access to electrical compartment
- Review of the electrical installation with slotted trunking and separation into 2 rails :
  - 1 internal control rail
  - 1 customer connection rail
- On/off button on the unit Right side
- Built-in transformer 2x115V / 2x12V (for control 24VAC), (possibility to have 115V control voltage)
- Improved natural ventilation with more openings
- No LED power-on indicator

# New models RTH-LC

# Devatec RTH-LC New Model

- Standard safety thermoswitch on each tank

- Position of the water level detector on the front for much easier access

- Solenoid valves for drain and inlet water in 24VAC

- Stronger fixation on the cabinet with screws

- Stronger door fixation with inserts.

- New cabinet design with better access to electrical compartment
- Review of the electrical installation with slotted trunking and separation into 2 rails :
  - 1 internal control rail
  - 1 customer connection rail

- Built-in transformer 2x115V / 2x12V (for control 24VAC), (possibility to have 115V control voltage)

- On/off button on the unit Right side

- Change of position of the fan to bottom part of the cabinet for improved ventilation

- No LED power-on indicator

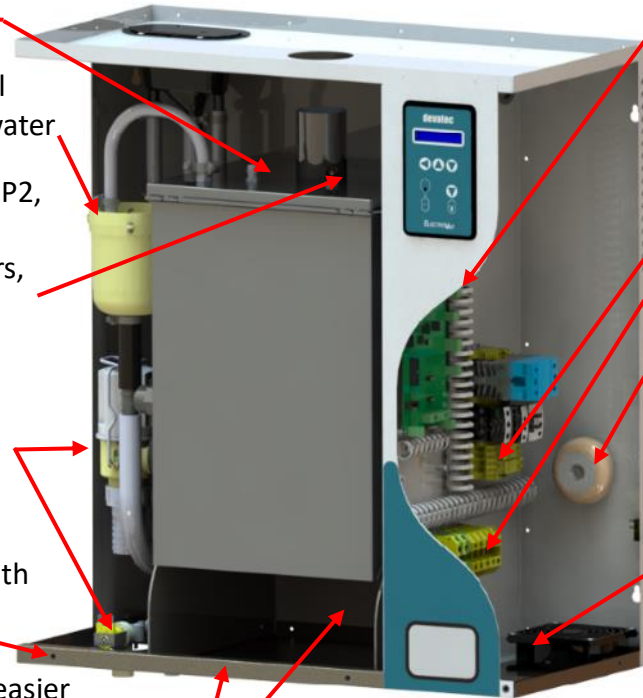

# New models RTH-HC

# Devatec RTH-HC New Model

- Standard safety thermoswitch on each tank
- Standard FLOAT type level detector for all types of water
- Removal of terminals P1, P2, P3, P4, P5, P6: to simplify service (WAGO connectors, easier heating element replacement).
- Solenoid valves for drain and inlet water in 24VAC
- Stronger fixation on the cabinet with screws
- Stronger door fixation with inserts.
- Reinforced cabinet and easier access to holes for wall mounting

- New cabinet design with better access to electrical compartment
- Review of the electrical installation with slotted trunking and separation into 2 rails :
  - 1 internal control rail
  - 1 customer connection rail
- Built-in transformer 2x115V / 2x12V (for control 24VAC), (possibility to have 115V control voltage)
- On/off button on the unit Right side
- Change of position of the fan to bottom part of the cabinet for improved ventilation
- No LED power-on indicator

# Option changes

## Support chair :

Possible to be sold in kit form (reducing shipping costs).  
Stainless steel support chair leg, stainless steel brushed finish  
Reduction of the price of the option

## Cooling system :

Factory assembly  
Better cooling efficiency (65°C max measured on manual drain)  
Reduction of the price of these options.  
Available for ELMC, RTH-LC and RTH series.

## Transformer option :

1 code for option instead of 4 different ones (380-600V)

## Offshore option :

No offshore range, but an offshore option valid for all models, including

- Ferrite,
- One 690VAC transformer fitted.

**Flexible water supply hose and 1m drain hose  
not included in unit price anymore.**

**Available in OPTION  
(only drain and steam hoses clamps supplied)**
